1. This memorandum is in response to your requirement dated 31 January 1963 which requested an overall configuration and dimensions of a large antenna reportedly located on Mys Set Navolok, USSR

2. No configuration could be ascertained due to poor photographic scale and quality. No dimensions could be determined due to the lack of necessary distances and locations. The locations of both the camera and the photo image could not be reliably determined.

3. Requirements necessary for studying the antenna consist of better photographic quality, longer focal length, and a complete panorama of the antenna and surrounding environs.

4. The photo analyst on this project is [REDACTED] and he may be contacted on extension [REDACTED] should you have any further questions concerning this project.
